

# Summerschool on Flow Chemistry

- Monday 11 August – Friday 15 August 2014 (one week)
- A Bachelor's degree in Chemistry is required. This course aims to train BSc, MSc and PhD students in flow chemistry and help them apply this knowledge in research projects
- Course fee €550, including graduate textbook on flow chemistry
- Part of Radboud Summerschool program, and includes social activities with participants of other summerschools
  
- Learning outcomes: you will learn to
  - Understand the scope and limitations of flow chemistry as a tool for organic synthesis
  - Translate a batchwise synthesis procedure into a continuous flow process
  - Provide an overview of new developments in the field of flow chemistry
  - Design and execute straightforward continuous flow reactions
- 2 ECTS
